TMP EVALUATION

As outlined in North Central Project Engineer Guide (2025 Edition), complete a Post-Construction Project Evaluation of the Traffic Management Plan (TMP), providing a brief discussion on any applicable items. Once the project is complete, the Construction PE will send this evaluation to the Design PM, who will attach it to the TMP before marking it complete in the TMP system.

Statement reflecting the overall usefulness of the TMP:
Changes that were made to correct oversights in the TMP:
Changes that were made to the original TMP and how successful those changes were:
Average delay time, queue, etc., during construction:
How frequently were complaints made about the project, the nature of complaints and how they were resolved:
Type of crashes/incidents that occurred during construction, and how they were resolved:
Recommendations or suggestions for future projects of similar type:
Highlight the areas of the TMP that were successfully implemented:
